Department of Radiology

Best in Practice: Radiation Dose Optimization

This program will discuss the importance of radiation dose optimization in diagnostic imaging. Topics to be covered include an overview of radiation dose monitoring, scientific principles of radiation dose, and clinical applications of dose optimization in thoracic imaging, cardiac imaging and dual-energy CT applications.

Speakers:

Danny C. Kim, MD, MSE

Mitya Barreto, MS, DEng

Jane P. Ko, MD

M. Barbara Srichai-Parsia, MD, FAHA, FACC

Alec J. Megibow, MD, MPH, FACR

May 16, 2012

Skirball 3rd Floor – Seminar Room

5:00 pm – 6:15 pm

NYU School of Medicine

550 First Avenue, New York City

This lecture is hosted by Michael P. Recht, M.D. Chairman, Department of Radiology
